

TODAY THE CAMPAIGN FOR MOSQUITO FREE HONOLULU STARTS IN FULL BLAST

National Guards to Patrol Quarantine Lines at Kalihi—The Plans for the Wiggler War Complete

(From Sunday's Advertiser.)

Three things featured November 4 in the history of Honolulu's great effort to rid itself of its only pest, the mosquito.

The first was the completion of the last detail regarding the plans for the campaign.

The second was the announcement of the official plan and the schedule of cost for the three months' work—\$146,848.80.

The third was the issuance of official orders placing the Kalihi Camp district under martial law and the assignment of officers and men to duty there as a military cordon.

And the campaign begins this morning. The work is fairly started.

The anti-mosquito campaign, the largest undertaking ever attempted by the city of Honolulu in the name of civic cleanliness, will commence this morning at ten o'clock from the Judiciary building headquarters of the citizens' committee. Dr. D. H. Currie, the federal officer especially detailed by the government for the work, will take charge of the mosquito machine that has been worked up, and issue his first orders. Every member of the committee will be present to assist.

The call for automobiles was answered and Chairman Dillingham announced at the meeting held yesterday noon, that machines with a total capacity for 33 passengers had been volunteered and that four more had been tendered if they were absolutely needed, their owners having planned to spend the day in the country but being willing to cancel these plans if it was so required. Although other officers were made during the afternoon, there were automobiles needed to carry about twenty more persons and any machine which appears at headquarters this afternoon at half-past one can find work for itself.

"It now looks as if we were down to the mere details," said Chairman Dillingham at the meeting yesterday, after it had finally come to a halt for want of something else to do. "I think that we can leave those to Doctor Currie and assist him only in the arranging of ideas."

The Finances.

The committee authorized its first statement regarding finances yesterday afternoon for although the first matter it took up last Tuesday night was that of ways and means, it has hitherto waited for the perfection of its plans in order that a definite statement might be made. The total sum now figured to cover the expenses of the campaign is set at \$146,848.80. This is about thirteen thousand dollars more than the figure first given out.

Doctor Currie explains that this is strictly for an anti-wiggler campaign. With the appearance of cases this week it might be necessary to start an emergency campaign to kill all adult mosquitoes, which will require an additional sum. The "machines" with which the work is to be accomplished has been built up so that it will be able to meet and carry on any emergency, or any manner of campaign that might be required.

To offset this required sum there are approximately between seventy and ninety thousand dollars of government money so appropriated that the legal opinion is that they can be used. The money will have, for the present, to be met by private funds.

The Committee Reports.

Chairman Dillingham yesterday read report of the week's work of the committee which was authorized to be published. He stated that the plans evolved were heartily approved by the city and navy officials, by the service medical men, by the territorial government health officials and by the officers of the marine hospital and public health service, and that they had, indeed, been worked up largely with the help of those named. The three paths of the campaign, he stated, would cost in round figures approximately \$50,000. Regarding finances he stated that the committee recommended that public funds be used, and that if there are not at present sufficient, a special session of the legislature be called.

"It will, however," he concluded, "be necessary in any event to have a certain sum of money with which to meet expenditures which, for good reasons, cannot be met by public funds. It will, however, be used for expenditures absolutely necessary in the carrying out of the plans."

The Official Plan.

Following the reading of this report a publication of the official plan of work prepared by Doctor Currie three days ago was authorized. Chairman Dillingham and Doctor Currie later at over it and revised it considerably, condensing it as far as possible, and revising the detailed schedule. It now is as follows:

The town between Diamond Head and Puukahi Hill has been divided into districts.

A lieutenant will be placed over each district.

These six districts have been subdivided into eight precincts each, making a total of forty-eight precincts for the city.

An overseer will be placed over each precinct.

All of the lieutenants and district overseers will be selected from commissioned Army and Navy officers. Each precinct overseer will have at his working force of ten men, wagon and driver.

Each precinct will be approximately 200 acres or twenty acres to the Dr. Donald H. Currie will be in

charge of the whole work as superintendent of this special campaign under the authority of the board of health, having been detailed for this work by Surgeon General Wyman, the arrangement being that Doctor Currie will hold this office until the arrival of Dr. Rupert Blue on November 11th, Doctor Blue coming with authority to take this special detail.

"The lunas of each precinct will report to the lieutenant in charge of their respective district and the district lieutenants will report to Doctor Currie."

"The headquarters occupied by Doctor Currie will be in the Judiciary building rooms formerly occupied by the federal court officials."

"The estimate of cost for the three months' campaign has been worked out in detail, and is summarized as follows:

| | |
|--------------------------------|--------------|
| Headquarters | \$ 2,850.00 |
| Laborers and teams | 118,800.00 |
| Tools, supplies and implements | 4,816.00 |
| Chemicals | 6,852.00 |
| Incidentals allowance, | |
| 10 per cent | 13,340.80 |
| Total | \$146,848.80 |

Inspectors are Instructed.

Doctor Currie has prepared a lengthy and comprehensive paper of instruction for his district overseers covering ten pages, which is by far the most complete presentation of the subject yet prepared.

Martial Law.

The first order issued by officers of the national guard in many years proclaiming what is tantamount to martial law in any district of the city was issued yesterday morning, as follows:

Special Orders No. 42. Upon the request of the territorial board of health the adjutant general is directed to assume control of such portion of the Kalihi district in the city of Honolulu, as may be indicated by the president of the board of health, and to establish a military quarantine camp thereon, allowing no person to enter or depart therefrom except in conformity with such rules as may be established by the board of health, or upon the written permission of the president of the board of health. By order of the Governor.

JOHN W. JONES.

In the afternoon another order was issued describing the district in detail and assigning the officers. Captain J. M. Camara has been temporarily relieved from duty with his company and will assume command of the quarantining force, which will consist of three sergeants, three corporals, fifteen privates, and one cook who are ordered to report for duty fully equipped for field service. Then, says the order:

Penalty Severe.

"All persons are cautioned to observe the quarantine established and not to enter within the lines established by this order. Any violation of this order will subject the person guilty thereof to arrest and detention for the entire time of quarantine (which may extend to a period of 90 days) and a fine of \$25."

"All persons quarantined, and all persons engaged in maintaining the quarantine, will obey the orders and rules established by the commanding officer of the camp."

"The quartermaster's department will furnish the necessary transportation and the subsistence department will furnish subsistence for the detail herein ordered."

"Officers and men detailed for duty in accordance with this order are entitled to and will receive pay under the provisions of G. O. No. 8, s. a, these headquarters."

A Cheerful Development.

Governor Frear has discovered a hopeful side to the single case of yellow fever that has occurred, for the man did not become ill until Thursday.

READY FOR FUMIGATION.

One of the cottages in Kalihi Camp, with windows and doors sealed, all cracks pasted over and canvas drawn around sill posts. Every mosquito on the premises must die in sulphur fumes.

so there has been less loss of time in the light than was at first thought.

"We have been investigating the case further," said Governor Frear, "as to the time when the man was taken ill, and we find that he was not taken ill until Thursday evening. He then went to bed, and does not remember, that any mosquitoes bit him. Of course, mosquitoes might have bitten him, as one cannot always remember these things."

"Anyway having been taken ill on Thursday and not Wednesday, diminishes the chances of infection from mosquitoes, and increases the chances that all the mosquitoes, that were in his place at the time that he was ill have been destroyed."

Educational Work.

The educational work is being carried out on the large plans first laid and every meeting independent of it is of the main committee's work, adds impetus to the great campaign by fostering a spirit of cooperation.

The fight against the mosquito is to be carried into the schools for the children at all the public schools are to bear addresses by physicians on the necessity of killing mosquitoes, in order to lessen the danger of spreading yellow fever.

Superintendent of Education Pope stated yesterday that circulars will be sent to the principals of the schools notifying them that addresses are to be delivered by physicians within the next few days. Arrangements are to be made with the principals in order that the convenience of the schools may be studied, as well as enabling the principals to get together the largest number of pupils to hear the lecture.

The two meetings held last night, one with the Chinese and the other with the Portuguese, met with the same measure of success as have the previous ones. The Chinese assembled at the rooms of the United Chinese Societies and the Portuguese at the Lusitana Hall. Both audiences were large and attentive and every auditor left the hall a worker for the "cause."

Doctors Hobbs, Currie and Ramus were the speakers.

The physicians of this city are setting a splendid example in conforming their own yards to the standards of non-mosquito breeding gardens. All the banana trees and many traveler palms were cut down several days ago.

BIGAMIST SENTENCED TO SERVE TWO YEARS

Two years in jail and a fine of ten dollars and costs was the sentence handed out to Henry N. Long, the much married policeman, who pleaded guilty to a charge of bigamy in federal court yesterday morning. Long has a wife and three children in Mississippi, another wife in Texas, and a third wife and one child in Honolulu, which appears to be a fairly good record.

In the investigation made by grand jury last week it developed that Long lived with his Mississippi wife for four years, his Texas wife a shorter time as he was investigated for bigamy there, but got away in some way, coming here as a member of the Marine Corps. Matrimony again was his end and he led to the altar a Honolulu girl, the couple now having one child.

After discharge from the marine corps Long joined the local police force of which he was a member for over six months, up to the time of his arrest. His downfall came in the shape of a letter from his first wife who had heard he was in Honolulu and was making enquiries for him.

After an investigation by the grand jury Long was indicted, and when his case came up yesterday he pleaded guilty in the charge, and was sentenced by Judge Clemons as stated.

HILLO FOLKS WILL HAVE A CLEANUP

(Special Wireless to The Advertiser.)
HILLO, November 4.—A public mass meeting has been called for Monday afternoon, at which the question of the need of reclamation in and about Hillo will be taken up, together with the general need of a thorough cleaning up of the town.

ACCIDENT DELAYS AVIATOR.

HAWKING, November 4.—Aviator Rodgers was delayed today on account of trouble with the engine of his machine. He expects to resume flight tonight.

SUPERVISORS TO HELP CAMPAIGN

McClellan Says Everything Will Be Done by City Fathers.

(From Sunday's Advertiser.)

"We expect to do all possible to help the board of health in the mosquito campaign," said Supervisor McClellan, member of the committee on sanitation and health, yesterday afternoon in discussing the problem which now faces the city.

The Democratic supervisor said that he had offered all assistance possible to President Pratt a couple of days ago, and that in response the head of the health board had made a call on the city and county for teams for hauling at Kalihi Camp, which had been supplied.

City Teams Help.

"Yesterday there were four city teams there under orders of the health board, and today nearly all the teams in the city are on hand to help out if needed."

"In addition we put four teams to work hauling away garbage such as bananas and tin cans which have begun to be put out already, these in addition to the regular teams, and text week I have provided for a three-ton automobile truck to assist the teams in the large amount of hauling which will have to be done."

Take Out to Sea.

Supervisor McClellan believes there will be a considerable question about taking care of the additional refuse which will be hauled to the incinerator beginning tomorrow morning, and he thinks that some plan will have to be thought out to take care of the banana stalks and tin cans.

It has been suggested that these be loaded on scows and towed miles out to sea to be dumped, said McClellan, and he thought that would be the most feasible way of caring for the stuff.

More Men—More Money.

"It will take extra men at the incinerator anyway," said the supervisor, "and we are looking to spend considerable extra money in doing our share in this campaign."

"I am told on good authority of vacant lots near houses of well-to-do persons which are filled with tin cans, and these persons are eminently able to see that the cans are carted from their homes and pay for the service."

"Of course it may be a question of the Asiatic servants taking this way to be rid of the articles, but the owners of the houses are responsible, nevertheless."

"I believe it will bring out much more stuff than did clean-up day, but the city is willing to do its share in the work and will appropriate extra money from the general fund for the purpose," he concluded.

ROAD LINES CUT A HAWAIIAN GRAVEYARD

Land Commissioner Judd, Surveyor Wall and Chief Clerk Tucker, returned from Kullonon on Friday evening, having been there to inspect some land, they find that the proposed road runs over some Hawaiian graves, making alterations necessary.

"Further up the valley," said Mr. Judd, "we found some additional land that might just as well be included amongst the homestead tracts. This will mean that about five additional tracts will be added. The land will be surveyed at about the same time as the road lines are changed. With these additional tracts, it will mean about fifteen homesteads altogether."

"There are some Hawaiians living on the lots, and they might have preference rights of purchase. This will be investigated, so I cannot say anything yet."

FIFTEENTH INFANTRY IS ORDERED TO MANILA

SAN FRANCISCO, November 4.—The Fifteenth Infantry, Col. F. B. Jones, has been ordered ready to sail on the cloth line, for Manila.

REBELS FIRE UPON JAPANESE WARSHIP; TAKE BRITISH SHIP

International Complications May Follow in Connection With Episodes—Hankow and Hanyang Bombarded.

(Special Cable to The Advertiser and the Hawaii Shimpco.)

TOKIO, November 4.—An unexpected international feature has been injected into the revolution in China, word being received by the department of the navy here yesterday that the Chinese revolutionists had committed an act of war against Japan by bombarding a Japanese warship, under the Japanese flag.

The ship in question is the destroyer Hatahimo, which had been ordered to the Chinese coast to protect Japanese citizens in the fighting. The details of the firing upon the ship have not been received.

It is further reported that the revolutionists yesterday took forcible possession of a British steamer.

Escape from Burning Mission.

(By Associated Press.)

HANKOW, November 5.—During the bombardment of this city yesterday by the Imperialists the Wesleyan Mission for the blind was injured by shells and set on fire. The blind inmates escaped and have taken refuge in the London Mission.

The shelling of the native city has caused considerable damage and many casualties. The city was set on fire a number of times by bursting shells, but the flames were extinguished each time before they could threaten the destruction of the city.

National Assembly May Quit.

PEKING, November 5.—It is reported that the national assembly has decided to resign in a body, owing to protests that it is without authority to draft the new constitution.

The people of the various provinces oppose this assumption of authority on the ground that the members of the assembly were not elected for this purpose and do not represent them.

Yuan Shih-Kai Has Not Resigned.
Yuan Shih-Kai has issued an edict in which he denies that he has resigned, but asserts that negotiations with the rebels continue. His course has been approved by the throne.

The third division of the Imperial army is mobilizing at Lanchow and will probably proceed as soon as possible to this city.

Tan Shao Yi, formerly minister of posts and communications, has been re-appointed to this position, but has refused to accept the place.

Cruiser Albany on Guard.

SHANGHAI, November 5.—The United States Cruiser Albany is at Wusung for the purpose of protecting the cable and cable office there.

Two of the torpedo boats of the Imperial Chinese Navy have been turned over to the revolutionists by their crews, who have joined with them.

The revolutionary government is effective in keeping order in the city. They have obtained possession of the powder factory and gunnery in port and have distributed 10,000 Mauser rifles among their followers.

Dr. Sun Yat Sen Resigns.

SAN FRANCISCO, November 5.—It is rumored in this city among the members of the Young China Party that Dr. Sun Yat Sen has refused to accept the offer of the presidency of the new Chinese Republic. It is also stated that he has resigned or intends to resign the leadership of the Chinese junta in the United States.

Shanghai Police Aid Rebels.

(Special Cable to the Sun Chung Kweok Bo.)

SHANGHAI, November 4.—This city is now completely held by the revolutionists, who first attacked at six o'clock on the evening of Thursday. The entrance of the revolutionists was the signal of revolt among the residents of the Chinese quarters, the city police at once joining the invaders. The arsenal was attacked, but the garrison repulsed the police and troops. The revolutionists then turned their attention to the local court buildings, burning these.

Lieu Yen Yeuk, the Taoist of Shanghai, sought refuge in the British concession.

The same day, Thursday, the Imperialists began to shell the city of Hanyang, near Hankow. More than half the city is in ruins from the shell fire and the conflagration that broke out as a result.

Citizens Rose.

Yesterday the revolutionists resumed their attack upon the arsenal here, assisted by a large force of citizen volunteers. There was some brisk skirmishing before the arsenal garrison surrendered.

EXTRAORDINARY SESSION OF LEGISLATURE CALLED

SACRAMENTO, California, November 4.—An extraordinary session of the California legislature has been called for November 27, in place of the proposed extra session that was to be called on December 6.

TENTH VICTIM HERSELF.

CHICAGO, November 5.—Louise Vernilly, who was arrested yesterday on charges of killing nine persons, made an effort last evening to end her life by taking poison.

APPEAL OF UNION IN DYNAMITE CASE GRANTED

INDIANAPOLIS, November 4.—The county criminal court judge has granted the appeal of the bridge workers' appeal from his decision, giving the federal authorities possession of the dynamite to be used as evidence in the McNaughton case.

GOVERNMENT KEPT ON SAFE SIDE

Final Homestead Payment Was Not Accepted, but Banked in Separate Account.

HILLO, November 3.—The "friendly" suit between the land commissioner and the Kaiwika Third settlers, the issuance of whose land patents has been held up until such time when the dispute between them and the Territory may be settled by the courts, has begun to take on interest.

When the respondents filed their answer to the original case as stated by the attorney general, they claimed that the settlers had already paid all the money they had agreed to pay for their lots, and that the Territory had received this money and had placed it in the treasury.

Now the Territory has filed a replication in which it denies that this is the case. Says the land commissioner in the replication, filed in the matter of Alfred Rennie Henderson, in part:

"We deny that the sum of \$1,610 mentioned in said Paragraph 4 of respondent's answer has been accepted by the petitioner's predecessor in office as final payment of the purchase price, and denies that the said sum of \$1,610 has been paid into the treasury of the Territory of Hawaii as a government realization, but states that under and by the terms of the said respondent's 'Freehold Agreement No. 67' the said freeholder became bound to pay the sum of \$1,610 in four installments; that the respondent delivered to George H. Williams, subagent of public lands at Hillo, on July 18, 1910, the sum of \$410 as final payment under said freehold agreement; that said sum of \$410 was by George H. Williams transmitted to the office of the commissioner of public lands on or about April 30, 1911, and was by order of the said commissioner on May 9, 1911, deposited in the banking house of Bishop & Co., in the name of J. D. Trecker, chief clerk, as a special deposit to be held in abeyance until the final adjudication as to the respondent's right to a patent for the land applied for by him."

TRIPOLI IS REPORTED CAPTURED BY TURKS

Special Dispatch Says Italians Are Hard Pressed and Cholera Raging.

MALTA, November 5.—A well defined rumor is prevalent here that the Turks and Arabs have retaken the city of Tripoli after some desperate fighting.

Italians Hard Pressed.

LONDON, November 5.—An uncorroborated special dispatch to this city states in the most emphatic manner that the Italians are exceedingly hard pressed at Tripoli by the Turkish and Arab troops.

The conditions in that city are reported as discouraging and that the cholera is raging among the people who remain in the city and among the Italian troops.

It is asserted that the reports of the progress of the war as sent out by Italy are for the most part falsehoods.

BELIEVE BANK ROBBER IS CAUGHT AT LAST

VANCOUVER, British Columbia, November 4.—John Bozayk, a foreigner, was arrested here today as a suspect of the robbery of the New Westminster bank. When searched \$4000 in bills of that bank were found on his person. Officials of the bank have identified the bills. It is believed the right man has been taken.

FOLLOWS NATURE'S PLAN.

Medicine that aid nature are always most effective. Chamberlain's Cough Remedy acts on this plan. It attacks the cough, relieves the lungs, opens the secretions and aids nature in restoring the system to a healthy condition. Thousands have testified to its superior excellence. Put sole to all druggists. Enoch, Smith & Co., Ltd., agents for Hawaii.

ADJUTANT GENERAL JONES.
